Drainage Report — THANDALAM

Village Area: 198.94 ha

Key Findings

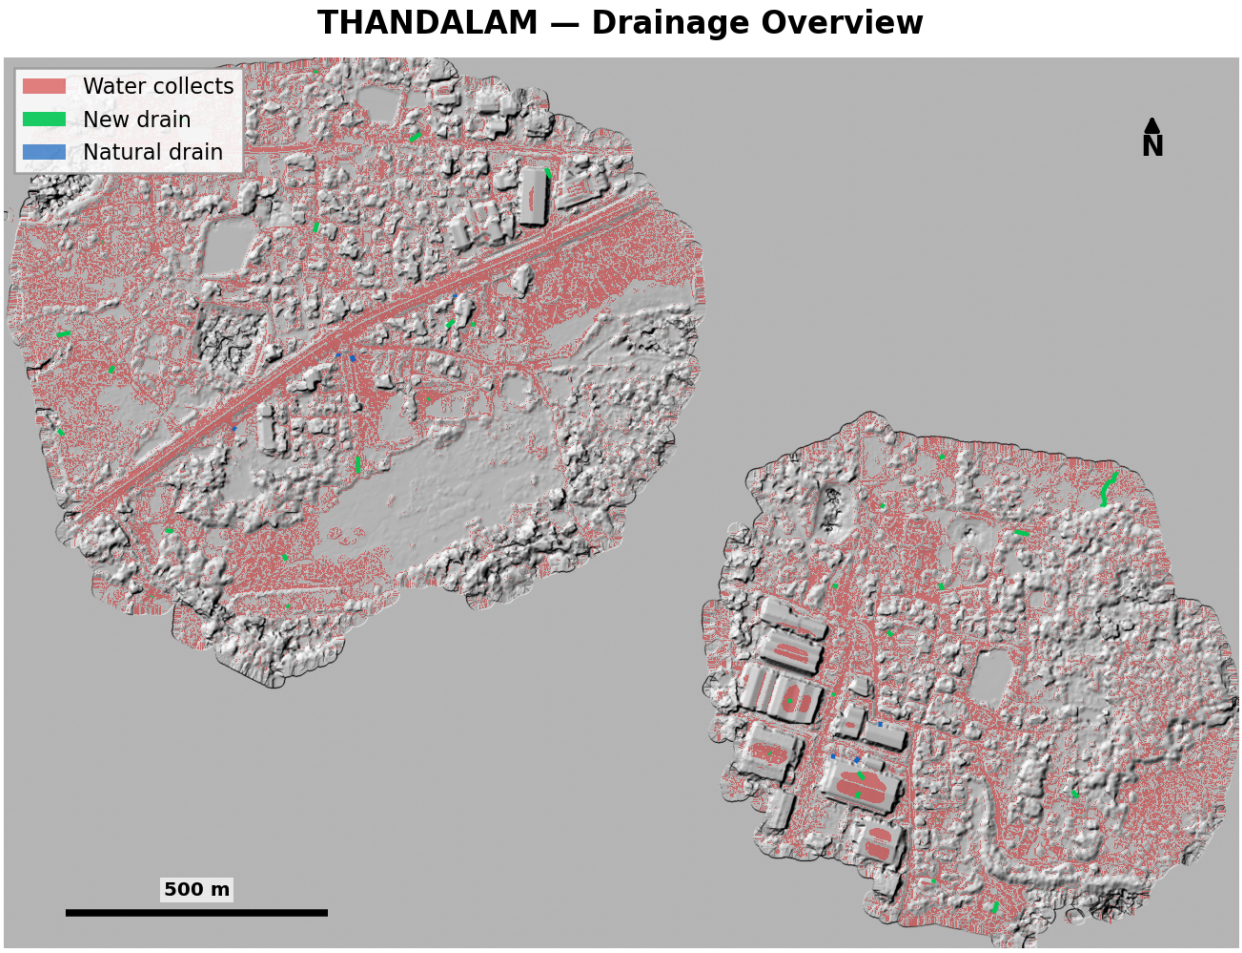
Drainage Status	Gravity Feasible
High-Risk Area	22.3 %
Total New Drain	0.50 km
Max Elevation Lift	0.40 m

Recommendation

Surface drainage channels are sufficient for this village. Gravity-based flow can move water to natural drains without pumping infrastructure.

Standard gravity-based drainage sufficient. Prioritize channel clearing and maintenance of existing waterways.

Drainage Map — THANDALAM



Priority Zones — THANDALAM

Priority zones where water collects most. Build drains for Rank 1 first.

Rank	Area (ha)	Drain Length (m)	Feasible
1	6.94	18.4	Yes
2	0.50	6.4	Yes
3	0.85	9.5	Yes
4	0.18	7.0	Yes
5	0.45	12.0	Yes
6	0.15	8.1	Yes
7	2.71	16.4	Yes
8	0.88	13.0	Yes
9	0.11	20.1	Yes
10	0.14	1.0	Yes
